<b>40-49: 124</b> (16.6%)	<b>90-99: 8</b> (1.1%)

### HOW WE ARE SEEING COVID-19 SPREAD

- In the days prior to individuals becoming sick or while experiencing symptoms, individuals reported attending gatherings where people are not social distancing and not wearing masks
- We continue to see spread between positive cases and other people living in the household/living unit.
- We are seeing more community spread, meaning individuals are unsure where they got the virus.

Currently, there are 53 active public health investigations.
